FOR POWER SUPPLIES AND ACCESSORIES SEE PAGE 80.

ICY HE IFR's passive infrared sensor detects movement and temperature changes within a symmetrical cone of around 80 degrees.

See the infographic for more details on the operation and correct installation of **ICY HE IFR**.

SMART FITTING SYSTEM

ICY IFR is equipped with a smart fitting system using a steel clip with lateral pressure. This allows the profile to be installed quickly with no need for glue. The system also means the profile can easily be removed from the milled groove if necessary.
