MAORI

MAORI is a wood shelf support to be slotted into the panel by making face borings. It is ideal for modular cabinets, bookcases and modular furniture sporting a wide range of thicknesses. In fact MAORI can be used for shelves with minimum thickness of 12mm.

The small side bracket round ledge flushes with the lower side of the shelf making it aesthetically very elegant.

The panel has to be pushed downwards onto the side brackets, which can be screwed into any position required. The side bracket slots into the socket of the shelf supports and a click locks the panel in position.

On the shelves more than 12 mm thick, it is possible to fix the plastic support permanently using an additional Ø3mm screw.

12 mm min.

Certificates available on request.

INSTALLATION AND ASSEMBLING

Assembling with alternative fixing options.

Assembling with pre-inserted spreading bush and screw to avoid hole damaging for shelf repositioning.

SPECIAL APPLICATION FOR SIDE PANEL 12 mm THICK:
Through hole fixing with metric sleeve.

OPTIONAL FIXING (12mm thick version excluded):
To achieve much more horizontal connection.

Optional fixing with pan head wood screw Ø 3 x 16 mm.

Also suitable for top and bottom panels when a back panel is used.
